

BPG 6215

PROPERTIES

This universal packing is braided from tough aramid yarn, making it an excellent choice for abrasive media and applications with shaft deflection. A special PTFE impregnation combined with a silicon-free lubricant ensures low friction, reliable sealing, and long-lasting performance under demanding operating conditions.

APPLICATIONS

The product is designed for use in rotary pump applications.

DENSITY

1.32 g/cm³

OPERATION PARAMETERS

Speed	25m/s (Rotary pumps)
Temperature	-100°C ... +280°C
pH Value	1 ... 13
Pressure	5 MPa (Rotary pumps)

PRODUCT SPECIFICATIONS

Media	Hot water, alkalis, organic solvents, salt solutions, slurries, oils, greases, medium concentration acids.
-------	--

BENEFITS

- Robust, durable construction
- Extreme wear resistance in abrasive media
- Long service life
- Highly resilient and flexible
- Reliable sealing under shaft deflection
