

BPG 4313

PROPERTIES

This packing is diagonally braided from fine cotton yarn and is impregnated with a mineral lubricant with graphite.

APPLICATIONS

This product is designed for use in rotary pumps.

OPERATION PARAMETERS

Speed	6 m/s
Temperature	-20°C ... +100°C
PH Value	6...9
Pressure	1.6 MPa
Density	1.15 g / cm ³

PRODUCT SPECIFICATIONS

Media*	Cold water, hot water, air etc.
--------	---------------------------------

VARIATIONS

BPG 4314	with a red grease impregnation
BPG 4315	with a light colour grease impregnation

BENEFITS

- Cost effective packing for rotary pumps
- Soft and flexible, no scoring on shaft

- Can prevent overheating during running in period
