

BPG 6313

PROPERTIES

This packing is ideal for the food processing and chemical industry. It is braided from pure PTFE yarn and has an additional PTFE impregnation. It uses a silicon-free lubricant.

APPLICATIONS

The product is designed for use in rotary pump applications.

OPERATION PARAMETERS

| | |
|-------------|--------------------------|
| Speed | 8 m/s |
| Temperature | -100...+250°C |
| PH Value | 1...14 |
| Pressure | 1.5 MPa |
| Density | 1.72 g / cm ³ |

PRODUCT SPECIFICATIONS

| | |
|--------------------------|---|
| Media* | Almost all chemicals* including concentrated and hot acids and alkalis. |
| Certificates / Approvals | FDA |

*Exceptions: molten alkali metals, fluorine and some fluorine compounds

BENEFITS

- Universal suitable for all chemicals
- Very pliable and dense when installed

- Very low leakage
